Chris –

My recommendation is a 50/50 split, unless you have different idea. Thanks much for your work on this.

Subject: Bacteria TMDL

Hi Andrew,

I hope you are enjoying what I am sure is a well-deserved break. We are pretty close to having load capacity calculated for Deschutes and tribs. The piece of information we need from you, that I may have mentioned a few weeks ago, is the percent of the LC that Ecology wishes to distribute among LA and WLA for each of the following waters:

ADAMS CREEK
BUTLER CREEK
DESCHUTES RIVER
ELLIS CREEK
INDIAN CREEK
MISSION CREEK
MOXLIE CREEK
PERCIVAL CREEK
REICHEL CREEK
SCHNEIDER CREEK
SPURGEON CREEK

Thanks again,

Chris
